| El cigarettes with lithium battery | Yes***** | No |
| Lithium battery | Yes ***** | No |

* Max 100 ml in hand luggage, ref. main rule on liquids.

**Aerosols class 2.2 (non-flammable and/or toxic propellant gas) are permitted. Max 500 ml/g per unit, max 2 l/kg per person in checked luggage.

*** Maximum one lighter per person. The lighter must be placed in a transparent 1-litre bag through the security check.

**** Hand disinfection with a higher percentage of alcohol is permitted.

***** Explosive substances are generally not permitted on board aircraft. In Norway, exceptions have been made to the general European ban on ammunition in checked baggage. The airlines may nevertheless have their own regulations that are stricter than the official requirements.

***** Certain lithium batteries also require prior approval to be carried in hand luggage. Contact the airline you are traveling with if you have any questions about lithium batteries. There are three limits when it comes to electronics with lithium batteries in hand luggage: – Under 100wh – (permit not required). – Between 100 and 160wh – (the airline's permission is required) – Over 160wh – (dangerous goods – not allowed to take in hand luggage or checked luggage).
